

Press release

“Stratos” concealed washroom and toilet fittings – the beautifully-designed, space-saving marvel from Franke

Square feet are often at a premium where plumbing is concerned, which creates a need for space-saving ideas. Franke Plumbing Systems has reacted to this demand by developing an extensive range of innovative, concealed plumbing products for direct wall installation. The top-of-the-range *Stratos* series of products also fulfils the very highest quality and design specifications, making it ideal for use in prestige hotel and catering establishments and exclusive health facilities.

The wide range of *Stratos* products runs from dispensers for soap, paper towels, waste bags and moist wipes to various types of waste bin and multifunctional toilet-roll holders. All of these items offer unique design characteristics and unmatched good looks, with harmonious curves combined with pure and elegant lines to create an object destined to match the very highest aesthetic considerations. The profile embossed with a discreet *Franke* logo adds just the right accent.

Special sizes and finishes

The housing sections made of brushed chrome-nickel steel, with a thickness of 1.5 to 2mm, are especially robust and designed to guarantee an above-average service life – even in conditions of heavy wear. Practical bag holders, self-closing lids and generously-sized storage space for items such as spare toilet rolls are designed for efficient functioning and ease of use. Safety locks operated with a Franke standard key help prevent misuse and simplify maintenance. Franke can also supply washroom products from the *Stratos* range to special order in non-standard sizes and customized finishes to meet the needs and specifications of individual users.
